

Enterprise EHR Solutions

YOUR CHALLENGES

- ▶ Implementing, upgrading, or replacing your EHR in response to multiple concurrent regulatory requirements, including Meaningful Use, ICD-10, and the Accountable Care Act.
- ▶ Preparing your physicians and staff for the changes associated with EHR deployment.
- ▶ Delivering highly-functional complex initiatives with limited resources, while maintaining legacy systems.
- ▶ Ensuring that high-value projects take priority over many competing initiatives.
- ▶ Understanding and meeting the full range of efforts required for an Enterprise EHR implementation, beyond the vendor-focused technical implementation scope.

Your enterprise EHR is the foundation for provision of safe and high-quality patient care. It is also the basis for successful Meaningful Use attestation, ICD-10 conversion, revenue cycle compliance, healthcare interoperability, and data analytics.

OUR STRATEGIC APPROACH

Leidos understands your challenges and will work side-by-side with you to ensure the success of your EHR strategy and investment. We offer a full range of services providing leadership, strategic, and tactical solutions and experienced resources for all stages of your EHR program. Our experience in EHR strategy, assessments, and implementation combine the best practices and lessons learned from hundreds of similar projects in healthcare organizations of all sizes and complexity.

ENTERPRISE EHR EXPERTISE

Enterprise Solutions teams typically consist of program advisors, project managers, and senior consultants with an average of 19 years experience in healthcare operations and healthcare IT; each has been in a leadership role for multiple EHR projects.

Our program directors and project managers have led hundreds of projects for clients of all sizes and levels of complexity.

We foster close collaboration with all major vendors to complement and supplement their knowledge and methodologies.

SERVICE OFFERINGS

Enterprise EHR Strategy

- ▶ Align goals and strategy, and develop your EHR Roadmap to achieve desired outcomes

EHR Program Assessment and Planning

- ▶ Assess current state and identify risks
- ▶ Determine scope based on your requirements
- ▶ Develop project plans and appropriate level of staffing
- ▶ Evaluate and plan technical infrastructure

EHR Advisory Services

ADVOCATING FOR YOUR SUCCESS

While each Enterprise program is unique, we have identified key success factors and best practices, based on lessons learned from previous engagements.

- ▶ **Develop** a strong governance model, focused on rapid, informed decision-making by leadership.
- ▶ **Managing** your enterprise EHR portfolio in accordance with industry-accepted best practices in project selection and program management.
- ▶ **Define** your program's scope up-front, and put controls in place to change it.
- ▶ **Make** the patient the center of your EHR design.
- ▶ **Support** your physicians and staff with well-designed clinical adoption and operational readiness programs.
- ▶ **Develop** an Enterprise EHR program plan that is comprehensive, realistic, and achievable.
- ▶ **Identify** the total level of effort required to deliver your Enterprise program, based on your custom plan, rather than relying on vendors' estimates of staffing and budget.

Leidos' experience in oversight of large-scale, complex EHR initiatives can help you to achieve your goals in a timely and high-quality manner. We proactively advocate for you, looking at the big picture and recommending solutions in accordance with your needs.
