

# MEDITECH Practice

**MEDITECH**, a leading vendor of integrated systems for community hospitals, offers solutions that will speed organizations toward Meaningful Use incentives and performance benefits associated with adoption of electronic health records. Leidos Health is not only experienced, but also well-positioned to help physicians' groups and hospitals manage the change and optimization necessary in both the Magic and Client Server environments as well as transition to 6.X. We bring expertise to your implementation and focus on your most critical objectives: patient safety, increased quality, complete reporting, efficient reimbursement, and high productivity.
