

Clinical Imaging, Informatics & Ancillary Systems Practice Overview

Leidos Health's Clinical Imaging, Informatics & Ancillary Systems (CII & AS) consultants help you achieve profitable growth by providing measurable and sustainable value to your customers. Each member of our team has assisted both single and multi-hospital organizations in a "best practices" approach to every project, and our extensive clinical experience is tailored to meet each client's specific needs.

LEIDOS HEALTH 5-STEP PROCESS TO CII & AS SUCCESS

- ▶ **Value Assessment** – we evaluate current processes, risks, and the culture of readiness
- ▶ **Optimization Plan** – we present improvement items prioritized by level of impact and effort for maximum value
- ▶ **Implementation Support** – we offer several degrees of implementation support, including staff augmentation for existing IT teams or full implementation managed entirely by Leidos Health
- ▶ **Project Management** – we provide highly experienced PMP® certified project managers to support and manage your most important and imperative initiatives
- ▶ **Physician and Staff Adoption** – we can develop and execute an adoption plan in concert with client marketing and sales teams
