

Meaningful Use Solutions

WHAT'S YOUR LOCATION ON THE MEANINGFUL USE ROADMAP?

Achieving Meaningful Use (MU) is much more than completing a checklist of static requirements for your certified Electronic Health Record (EHR). It is an ongoing, complex initiative that begins with a detailed mapping of requirements, clinical processes, and reporting functions, followed by a systematic enterprise-wide implementation or upgrade, monitoring, and reporting processes. We meet our customers where they are in complying with MU and help take them where they need to be by providing a customized MU strategy that focuses on:

EHR Incentive Program – attestations, planning for 2014 certified technology, reporting, policy and procedure validation, workflows

Desired MU Outcomes – maximize payments, avoid penalties, audit documentation strategy

MU Organizational Alignment – training and awareness, change management, clinical adoption, communication plans

MU Goals and Objectives – data aggregation strategy, clinical informatics engagement

MEANINGFUL USE EXPERTISE

With an average of 27 years of experience in healthcare operations and IT, we are a proven leader in helping many organizations with their assessments, strategy, and planning for all stages of MU. In fact, we have already helped several organizations successfully register, attest, and receive their payments. We have helped organizations with ranges of total MU incentive dollars of

\$5M to \$37M,

with most receiving first payments of between

\$1M and \$11M.

SERVICE OFFERINGS

- ▶ EHR Incentive Program – development, evaluation, and support; eligibility determination, incentive amount calculation, CMS registration, and attestation support
- ▶ MU Audit Documentation Preparation
- ▶ Core Menu Objectives Measurement Validation
- ▶ Advisory Services and Interpretive Research with CMS Experts

MU Stage 2 Long Term Goals –

Strategic investment planning, assessment and gap analysis, electronic submission of patient care summaries, HIE

MU Strategy and Roadmap – strategic planning, customized roadmap

Our consultants have deep vendor, workflow, and operational expertise. We can provide a cross-functional team of professional consultants with specific MU experience from roadmap development through optimization with actionable tasks and milestones.

OUR STRATEGIC APPROACH

Meaningful Use is only one step along the continuum of healthcare initiatives that organizations are facing today – in both acute and ambulatory environments. We work with clients to create a customized strategy, beginning by understanding their current environment, then developing and customizing a roadmap that goes beyond attestation.

35-LH-01

Our team can help fill the gap between your HIT vendors' MU deliverable commitments and your existing staff bandwidth. We have a track record of helping providers make progress toward compliance quickly, which translates into lower implementation costs and the protection of reimbursements, penalties, and costly audits.

STAGE 2 PREPARATION

Stage 2 of the CMS EHR Incentive Program begins in 2014, it uses advanced clinical processes. The requirements are focused on health information exchange between providers and promote patient engagement by giving patients secure online access to their health information.

First Payment Year	STAGE OF MEANINGFUL USE										
	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021
