

Cerner Practice

ADVANCING CERNER SYSTEMS TO IMPROVE OUTCOMES

As one of the leading health IT consulting firms, Leidos Health is committed to teaming with Cerner and our clients to ensure optimal functionality and use of Cerner/Siemens solutions. Our highly trained and experienced consultants help you plan, implement and optimize systems and solutions focused on improving patient care, reducing costs, and taking advantage of data through analytics and business intelligence.

Experience You Can Count On

With over 200 Cerner consultants, Leidos Health has one of the largest pools of Cerner consultants in the industry, and proven leadership and experience with a variety of Cerner Siemens and Millennium™ projects.

Our Cerner consultants average 15 years of experience, and more than 50% of our Cerner consultants are clinicians. Our team has a thorough understanding of Cerner clinical, financial, administrative, and technical areas and includes:

- ▶ Analysts
- ▶ Project managers
- ▶ Interface developers
- ▶ Report writers
- ▶ Trainers
- ▶ Clinical Informaticists

Solutions for All of Your Cerner Consulting Needs

Leidos Health is deeply experienced and well-positioned to help healthcare organizations implement, optimize and support Cerner's full suite of solutions. We offer complete lifecycle services to help you at any stage with your Cerner solution, and every resource assigned will have worked projects for the specific applications of the project. In addition, we are partnering with Cerner to deploy the Defense Healthcare Management System Modernization (DHMSM) program; the goal is to deliver an open, modern, secure, and highly interoperable healthcare IT system that meets the Department of Defense's (DoD) needs today and for years to come.

Strategy and Pre-implementation Planning

Our approach integrates our experiences and knowledge together with the Cerner implementation methodology to inform your total cost of ownership and strengthen your ability to prepare your team for a highly successful implementation.

Program Management

We have a proven track record of leading complex, enterprise-wide initiatives and can supply resources with business and clinical acumen. Our methodology and best-practice experience is built upon the Project Management Institute and Cerner's Model.

Process and Workflow Design

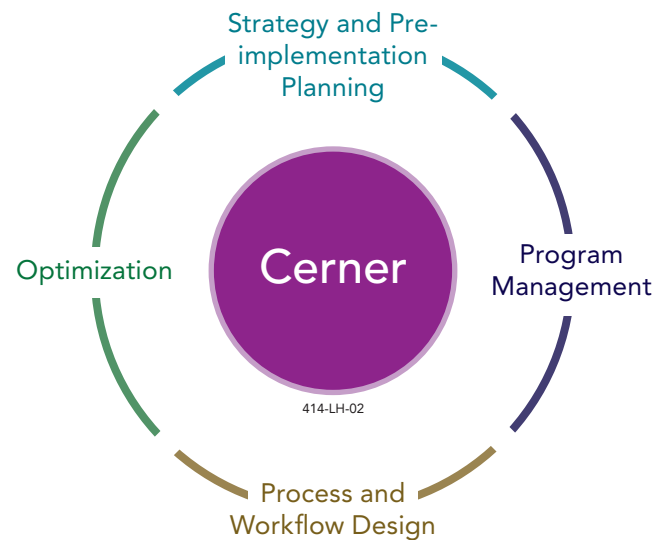

Our consultants bring years of validated experience and knowledge of the Revenue Cycle and Clinical Transformation processes that help maximize your technology investment, ensure adoption, and enhance the use of data and analytics through industry best practices.

Optimization

Our consultants can engage at strategic points during your project, including partnering with you at project planning and initiation, assisting with current to future state analysis and decisions, adoption methods, knowledge transfer to your staff, activation, and project closure.

Proven Expertise

Leidos Health professionals have played key leadership roles at more than 200 Cerner client sites, including leading academic medical centers, community hospitals, and large multi-entity health systems with complex workflow, adoption and integration requirements. In addition, we have delivered expertise, unique insight, and best practices on more than 1,700 unique Cerner engagements. To ensure a successful Cerner project, we leverage the

expertise of our highly seasoned Cerner consultants to maximize the advantages found in Cerner systems and methodologies. We will also assign a Cerner-experienced Project Manager (PM) who will work with customer personnel to ensure all tasks are properly managed and all risks are communicated and addressed. The PM will attend all status meetings and serve as a single point of contact, keeping communication clear and accountability direct.
