

Cybersecurity Solutions

NATIONAL SECURITY EXPERIENCE AND HEALTHCARE EXPERTISE

For more than 25 years, Leidos has provided critical information security services for the United States military and federal government. By combining this deep security experience with our healthcare expertise, Leidos Health is helping healthcare organizations manage and protect IT assets and sensitive data. Our security solutions span the full lifecycle and include security education, security management, incident response, monitoring and remediation, and risk assessment.

KEY STATISTICS

96% of hospitals have had at least one data breach in the last two years

60% of hospitals are not confident they can detect loss of patient data

69% don't have proper controls in place to detect/respond to a breach

52% of data breaches were discovered as a result of an audit or assessment

THREAT MONITORING:

Monitor the computing environment with minimal on-site footprint

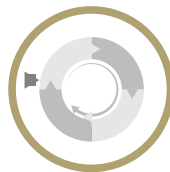

- ▶ Transparent service that extends client functionality
- ▶ Robust threat intelligence
- ▶ 24/7 continuous monitoring
- ▶ Dedicated engineer and account manager
- ▶ Proprietary reporting portal
- ▶ Network security operations center
- ▶ Build your threat profile

INCIDENT RESPONSE AND REMEDIATION:

Rapid response team to support eradication and recovery

- ▶ Security experts available for on-site remediation within 24 hours
- ▶ Expertise to set up appropriate incident response protocols
- ▶ Forensics: chain of custody assurance for potential eDiscovery

RISK ASSESSMENT:

Review of policy, procedures, architecture, and staffing

- ▶ Meaningful use assessment
- ▶ Examine staffing levels and effectiveness of roles
- ▶ Architecture walk-downs
- ▶ Penetration testing
- ▶ Desktop and server configurations
- ▶ Incident response and escalation
- ▶ Vulnerability management

SECURITY MANAGEMENT:

A menu of services

- ▶ Security program development
- ▶ Interim CISO
- ▶ Ethical hacking
- ▶ BYOD strategy development

ABOUT LEIDOS HEALTH

Leidos Health helps healthcare organizations achieve their goals of meeting regulatory requirements, improving quality of care, reducing costs and enhancing the patient experience. Its services include implementation and optimization of EHRs for all major vendors, as well as solutions for critical initiatives such as IT strategy, revenue cycle, clinical optimization, cybersecurity, Meaningful Use, ICD-10, technology infrastructure, and project management. Previously part of SAIC and including the former companies of maxIT Healthcare and Vitalize Consulting Solutions, Leidos Health is a company with uncommon capabilities and a 40 year legacy of success.
