Leidos Health is deeply experienced and well-positioned to help healthcare organizations implement, optimize and support Epic's full suite of applications. We bring certified Epic application expertise to your system implementation, upgrade, or optimization project that focuses on delivering those critical objectives you seek including enhanced patient safety, increased quality assurance, complete reporting, efficient reimbursement, and high staff productivity.

Leidos Health maintains an outstanding relationship with Epic. We understand the unique nature of today's healthcare IT environment where hospitals are being asked to deliver a broader menu of complex services and to interact with complementary organizations under the constraints of tighter budgets, mandated timelines, and legislated standards.

ABOUT OUR EPIC PRACTICE
