

FOR IMMEDIATE RELEASE

LEIDOS AWARDED CONTRACT BY U.S. NAVY BUREAU OF MEDICINE AND SURGERY

Company to Provide Psychological Health Support Services to the Naval Center for Combat and Operational Stress Control

(Reston, Va.) May 7, 2014 – [Leidos](#) [NYSE: LDOS], a national security, health and engineering solutions company, was awarded a prime contract by the U.S. Navy Bureau of Medicine and Surgery (BUMED) to provide psychological health support services to the Naval Center for Combat & Operational Stress Control (NCCOSC). The single-award cost-plus fixed-fee (CPFF) contract has a one-year base period of performance, two one-year options, and a total contract value of approximately \$15 million, if all options are exercised. Work will be performed primarily in San Diego, Calif.

The NCCOSC improves the psychological health of marines and sailors through comprehensive programs that educate service members, build resilience, aid research, and promote best practices in the treatment of combat and operational stress injuries.

Under the contract, Leidos will develop and implement the center's education and training programs; coordinate strategic communications, external relations and outreach to important communities; support Fleet Marine Forces, Navy Line and Navy Medicine clinicians via a research facilitation department; and develop, implement and sustain the center's data management capability.

"Ensuring the psychological well-being of our military personnel is important for the long-term strength of our armed forces, and crucial for our military families when they return home," said Steve Comber, President of Leidos Health. "We are pleased to support the Navy in facilitating important research, enhancing resilience and promoting best practices in the treatment of Post-Traumatic Stress Disorder and traumatic brain injuries so that our military service members get the care and support they need for a long and healthy life."

[About Leidos Health](#)

As a leader for more than 25 years in the healthcare industry, Leidos Health fuses some of the world's most advanced technologies with the brightest minds in science, research, and consulting. Today, Leidos Health is focused on developing next-generation solutions in areas such as biomedical research, public health, and health analytics to turn data into actionable information for clinicians and their patients. From leading groundbreaking medical research to fight diseases such as cancer, AIDS, and malaria, to implementing and optimizing electronic health records that enhance the research process and improve critical efficiencies – Leidos Health's passion to improve patient care and reduce costs is helping to transform healthcare.
